VERTICAL PLATFORM LIFT

Instantly access up to 60" (1.5m) high by cranking the lift up and utilizing the bridge ramp which reaches onto the step or platform.

ROLL IN PLACE & READY TO USE

This portable solution is silent and manual-powered, attendant operated and can roll easily across rough terrain. Minimal maintenance and long 20-year operating life.

BUILT FOR EXTREME WEATHER

The Mobilift is manufactured to exacting tolerances using aluminum and stainless-steel which have been tested and used in all weather conditions down to 58°F (-50°C) and up to 122°F (50°C) to ensure ultra-reliable, trouble-free use.

RELIABLE & SAFE

The Mobilift conforms to stringent safety requirements with each lift factory tested to 3,000lbs (1361kg) and has an unsurpassed 25-year safety record with thousands of lifts across the world.

PRODUCT SPECIFICATIONS

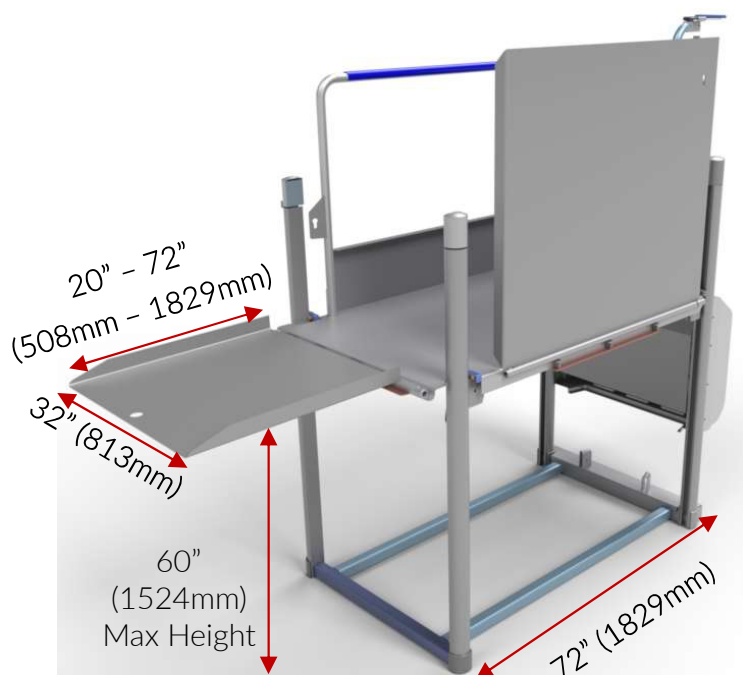

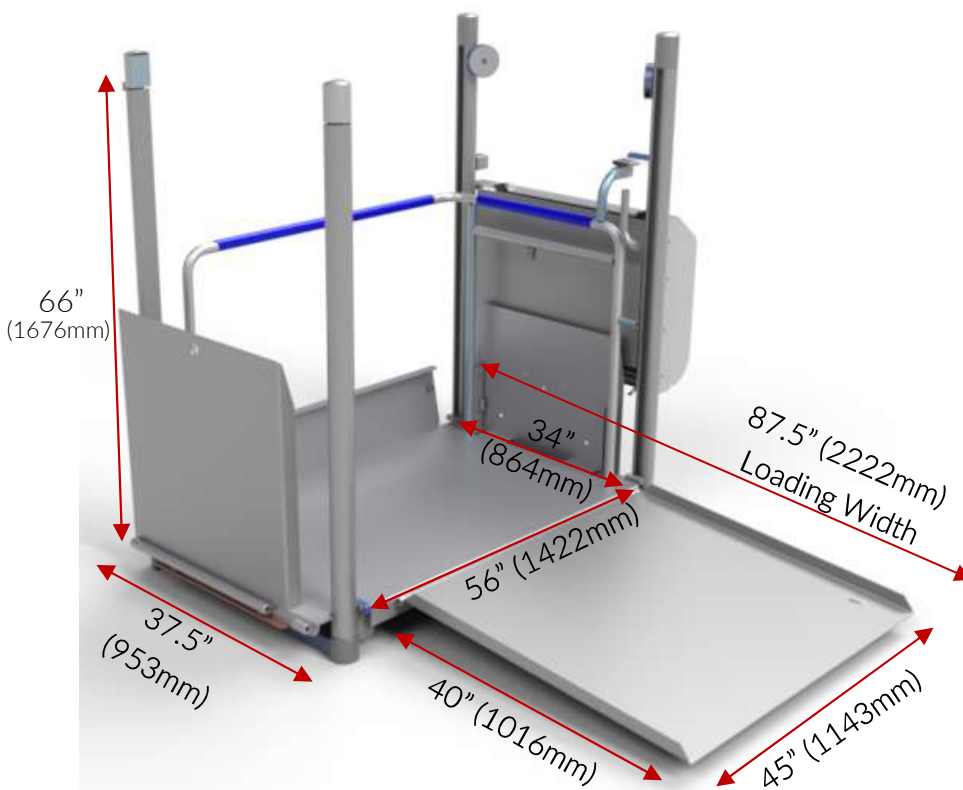

OPERATING

- Self-sufficient, no power required
- No special training required
- Easy-to-read pictogram operator decal
- 20 seconds to lift to max height
- 5lbs (2.3kg) to crank 150lb (68kg) load
- 11lbs (5kg) to crank 300lb (136kg) load
- Max Load is 600lb (272kg)

MOVING & TRANSPORTING

- Lift weighs 265lb (120kg)
- Rolls with only 5lb (2.3kg) force on smooth surfaces (feels like pushing a shopping cart)

2 Year Warranty from date of invoice covers equipment and includes after-sales support and assistance. Parts can generally be shipped within 48 hours.

“The Mobilift manual wheelchair lift is exactly what we needed. It is easy to use and move around, yet once the mechanism is set in place, it is solid and stationary. We have been pleased in using it to get our wheelchair students onto the stage in our auditorium. When we do not use it, we wheel it into a corner where it is out of the way.”
