

MOBILIFT EXTENDED BRIDGE RAMP OPTION

One of the most amazing features of the Mobilift is its ability to reach across stairs using the **Extended Bridge Ramp** option. This feature allows users to access levels where the staircase is the only method of entry. Without this option, users often have to resort to removing walls or railings in order to deploy a standard vertical platform lift (VPL). The **Extended Bridge Ramp** option is a great way to provide temporary wheelchair access at low cost.

The Mobilift CX with Extended Bridge Ramp showing the Integrated Folding Handrails

AVAILABLE EXTENDED BRIDGE RAMP LENGTHS

Bridge Ramp Length	Horizontal Length of Stair Accessible (6" less than ramp)	Handrail
10" (0.25m)	4" (0.10m)	Available upon request
20" (standard; 0.51m)	14" (0.36m)	Available upon request
33" (0.84m)	27" (0.69m)	Available upon request
46" (1.17m)	40" (1.02m)	Integrated Folding Handrails
56" (1.42m)	50" (1.27m)	Integrated Folding Handrails
66" (1.68m)	60" (1.52m)	Integrated Folding Handrails

Key notes:

- 1) The bridge ramp must overlap the upper landing by at least 6" (0.15m).
- 2) All ramps are 37" wide at the tip and 41" wide overall (due to the handrail hardware)
